Mastering Swift 4 - Fourth Edition

Now, Apple has released Swift 4. One of the primary goals of the Swift 4 compiler is to be source-compatible with Swift 3. This will allow us to compile both Swift 3 and Swift 4 projects with the Swift 4 compiler. Apple has established a community-owned source compatibility test suite that will be used to regression-test changes to the compiler.

The NumberFormatter class is a subclass of the Formatter abstract class that can be used to convert a number into a human-readable string with a specified format. This formatter is especially useful when we want to display a currency string since it will convert the number to the proper currency for the current locale.
