Now, with the emergence of eXtensible Markup Language (XML), Web developers are about to meet SGML head on. SGML was invented by Charles F. Goldfarb, and it was he who coined the term "markup language.". It all started in 1969 when Goldfarb, leading a small team at IBM, developed a language called GML.

Structuring XML documents (Book, 1998) [WorldCat.org]

Structuring XML documents is a useful book for information professionals preparing to create, maintain, or modify Document Type Declarations (DTDs) for technical writing staff. The title of this book is a little misleading. Structuring XML documents addresses SGML and, therefore, encompasses its subset, XML.
